☎ - 8829052087

Summary:

Data Science Trainee with a strong foundation in statistics, data analysis, and machine learning. Skilled in Python, SQL, data analysis, and end-to-end ML pipeline development. Proven ability to develop real-world projects including a deployed House Price Prediction web app, gesture-controlled automation system, and voice assistant. Passionate about solving real-world problems using data and continuously learning advanced AI technologies.

Skills:

Technical Skills:

- Programming Languages: Python, SQL((MySQL, SQLite)
 - Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
 - Machine Learning: Supervised Learning, Feature Engineering, Model Evaluation, End-to-End ML Pipeline
 - Tools: Git, GitHub, Jupyter Notebook, Flask, MS Excel, MS WORD, MS POWERPOINT,
 - Other: Data Visualization, Exploratory Data Analysis (EDA), Data Cleaning,
 - Web : HTML, CSS, Bootstrap, JavaScript (Basic)
-

Experience:

Data Science & Machine Learning Trainee– Tips-G, Alwar

(2024– Present)

- Built and deployed machine learning applications through project-based training.
 - Applied data preprocessing, feature engineering, and model evaluation techniques.
 - Strengthened Python and SQL skills while developing real-world automation solutions.
-

Projects:

House Price Prediction web App

- Built an end-to-end ML web application using Python, Scikit-learn, and Flask for real-time predictions.
- Performed EDA, feature engineering, and regression modeling to improve accuracy.
- Live Demo: [GitHub](#)

Hand Gesture Control System

- Developed a computer vision system using OpenCV and MediaPipe to control mouse and volume.

Online Booking Web App

- Created an online booking web application to manage reservations, process payments, and handle users.
-

Education:

Diploma in Data Science– Tips-G, Alwar

(2024– Present)

- Studying core concepts including Machine Learning, Data Analysis, SQL, Python, and Automation.
- Gaining hands-on experience through real-world data science projects and practical training.

Bachelor of Computer Applications (BCA)

Manipal University, Jaipur

(2024 –Present)

- Completed Third Semester with focus on Programming Fundamentals, Computer Architecture, and Mathematics.
